

Patheon® Release 28 Notes

Patheon Release 28 includes the following feature enhancements. Click on one of the following links to get more details on specific highlights of this release:

Essential Web App (EWA)

- [Visual Price Rounding Added to the EWA](#)

CardConnect

- [Capture Cardholder's First/Last Name from Credit Card Payments](#)

Patheon Reports

- [House Account Activity Report Updates](#)

If you have any questions about this or past releases, **please have your location code available** and contact the Patheon Support Team in the Knowledge Center at our new number **330.645.4201** or Knowledgecenter@drb.com

Essential Web App (EWA)

Visual Price Rounding Added to the EWA

The EWA is enhanced to now display the trailing **0** (zero) for amounts ending in **.10, .20, .30, .40, .50, .60, .70, .80, or .90**. For example, **\$25.50** is now displayed as **\$25.50**, not as **\$25.5**.

In the EWA, this specifically applies to **Available Plan price, Available Gift Card price, Available Wash price, Purchased Gift Card amount, and Shared Gift Card amount**.

CardConnect

Capture Cardholder First/Last Name from Credit Card Payments

When a customer who doesn't have a customer profile in Patheon visits a site and then successfully tenders a sale at a kiosk terminal via EMV, the payment cardholder's first name and last name are recorded in a customer profile in Patheon.

The customer's name will also then be visible when viewing the corresponding sale in Patheon sales history records. This feature applies for both Pay-As-You-Go wash sales and wash plan subscription sales.

- This feature does not apply to sales tendered at a cashier terminal. Payment cards submitted at a cashier terminal do not capture and record a customer's first name and last name in a Patheon customer profile.
- This feature only applies if the payment card is submitted via EMV entry. Payment cards submitted via contactless entry at a kiosk terminal do not capture and record a customer's first name and last name in a Patheon customer profile.

Patheon Reports

House Account Activity Report Updates

To make the House Account Activity Report easier to use, several formatting changes have been implemented.

The **Report Generated By** information is moved to the footer of the report, and it is replaced with the **Organization Name**. The details section is moved to the right side of the report.

House Account Activity Report								
DRB_Wash_Systems			Account Activity For					
			Account Name: SN 0515					
			Contact: Charles Rush					
			Address: 3245 pickle rd					
			Akron, Ohio 44312					
			Activity Dates: 02/01/2023 - 05/25/2023					
Summary								
Account Name	Account ID	Organization Name	Activity Date	Sales	Charges			
SN 0515	020304	QA Lab 1	2/1/2023 12:00:00 AM To 5/25/2023 11:59:00 PM	6	52.72			
				Totals	Sales	Charges	Payments	Balance Due
				6	52.72	10.00	42.72	

The following formatting edits are now available in the House Account Activity Report Detail pages:

1. To allow users to view house account activity for each location, detail pages are now separated by location. For Canadian sites, the Goods & Services Tax (GST) number is added to each page under the location name. Each detail page also includes the house account name and activity dates.
2. The **Detail** section of the **House Account Activity** report now displays the house account member's RFID and license plate in separate columns.
3. To allow the user to view each transaction's **Subtotal**, **Sales Tax**, and **Total** charges separately, the sales tax amount is now broken out from the house accounts transaction total.

House Account Activity Report
